Specification: ...meeting or a concert. The message service center receives and stores some messages from a **calling party** and then transfers the stored messages to a user in response to a request from...
...first, the telephone company 120 detects a telephone number of the telephone terminal 112 as **calling party** data. Then, the telephone company 120 records this **calling party** data and reception time together with a date into the memory area allocated to the...a list of only the related data of such a

minimum amount, such as a **calling party** number and a reception time regarding each stored message. This means that data related to... ..page. Another one step is that the MSC sends the storage data, for example a **calling party** number and a reception time, of message stored regarding the registered user to the Web...is included in the customer data, the MSC can send the storage data including a **calling party** number and a reception data of the message and additionally the E-mail address of... ..of the Web terminal 50. Herein, it is assumed that the registered user 10 is **previously notified** of a user ID and a password as an authentication code and a URL for the sake of calling the MSC 30.

The telephone terminal 12 is shown as a **calling party** and calls the contracted telephone terminal 11.

The telephone company 20 is connected to the message transfer service, the telephone company 20 transfers, to the MSC 30, a **calling party** directory number sent from the telephone terminal 12 by the use of a calling linefor corresponding to the registered user. The memory area records a reception time and a **calling party** data in accordance with a code data format, and a linked URL given to the...terminal 11. Thereafter, the MSC 30 executes a service guidance of the absence of the **calling party** by voice to the calling telephone terminal 12 through the telephone company 20 (Step 16). The MSC 30 records the **calling party** data received at the message storage request and the linked URL included in the Web... ..to the MSC 30 by the use of the URL. The screen 51 displays the **calling party** data, the reception time, and the linked URL by letters, as illustrated in Fig. 8... ..the screen and accessed to the Web page by click action of selecting one of **calling party** data for example. However, in Fig. 8, the linked URL is displayed on the screen... ..data thereof. And as an emergency item or a priority selection can distinguish by the **calling party** data and the reception time in the message storage data, the user can take out... ..the screen 51 of the Web terminal 50 by letters (Step 26).

Such data as **calling party** data, a reception time, and linked URL of each message are displayed in order of...are listed up and displayed only about minimum requirements for the service, such as the **calling party** data and the reception time regarding each of stored messages. And the listed storage data...take out a voice data format as it is. And the E-mail has a **calling party** data as a sender and a linked URL or a predetermined first length of the... ..the letters by a voice/letter converter as a subject.

Further, in case that the **calling party** terminal can send the message by both voice and image, the Web terminal can display... ..first received from the Web terminal by the registered user are a reception time, a **calling party** data, and a linked URL of a message, as depicted by an MSC service code... ..accesses to the MSC through the INTERNET. Accordingly, the user can confirm at least only **calling party** data and reception time for storage data of many messages and additionally at most one...

Claims: ...the method being characterized by comprising:

the first step of making access to the MSC **previously notified**, from the MSC through the INTERNET to obtain authentication of the message transfer service;

the...in advance; and

sending, from said MSC through said INTERNET, only message storage data including **calling party** data and a reception time of the message destined to the user specified by the... ..user specified by the E-mail address through the INTERNET, only message storage data including **calling party** data and a reception time of the message and data on the basis of the... ..sending, from the MSC to the user through the INTERNET, only message storage data including **calling party** data, a reception time of the message and data that are based on the registered...
